Daniel Bogert O'Brien is a United Church Minister who has served in the university, First Nations communities, and rural and urban communities in Western and Central Canada. His doctoral work explored the thinking of Ivan Illich and his post-doctoral study brought Illich into dialogue with the work of Thomas Merton around the culture of technology. He has published papers in journals of education, philosophy, and religion. He has a continued interest in the impact of the various techniques and technological culture of the contemporary world on the art of real human presence in various cultural forms.
